

Name: Arild Eliassen

Tel: +47 48 07 22 80

Address: Statoil ASA, N-4035 Stavanger, Norway

Education: dr.scient (Carbonate sedimentology & diagenesis) 2002

Research areas:

I have been working with the mid and upper-Carboniferous carbonate dominated succession on Spitsbergen. A main focus was to describe a large paleokarst system that had developed within the succession. I have also worked on Triassic lacustrine carbonates in southwest Britain.

Currently I work at the Research and Technology department in Statoil as a Petrologist. My main research today focus on diagenesis in both carbonate and siliciclastic rocks.
