

Name: Carlos Bahamon

Tel: 405 3253874

Address: 310A Wadsack Dr. Norman OK 73072

Education: BSc. Petroleum Engineering. Surcolombiana University Summer 2004
MSc. Petroleum Geology. Oklahoma University. Spring 2006

Research areas:

CARLOS BAHAMON is a geoscientist who has a background in engineering; he achieved his Bachelor of Science Degree in Petroleum Engineering from Surcolombiana University in Colombia. His earliest works in the industry include applying hydrogeology to oil field studies. A primary of his has been to integrate knowledge of both engineering and the geosciences. Recently he has focused his studies on the integration of multidisciplinary data for reservoir characterization, development and production of both conventional and non-conventional hydrocarbons, using sequence stratigraphy. Hocol, Integrated Geological Services, Weatherford, ATP Engineering, as well as some consulting comprise some of his five years of experience in the field. Currently Carlos is working on his Master's Thesis in Petroleum Geology at the School of Geology and Geophysics at the University of Oklahoma. In addition to his research he has been a teaching assistant for the Petroleum Geology and Unconventional Hydrocarbons courses. He can be reach at carlosbahamon@ou.edu

*Professional Interest: Development of new fields and redevelopment of matures field.
Integration of Multidisciplinary data to build reservoir models
Sequence Stratigraphy of mixed siliciclastic – carbonates environments*
