**Tel:** +1 281 366 8365, **Fax:** +1 281 366 7003

**Address:** BP – 501 Westlake Park Blvd, Houston Texas 77077, USA

**Education:** Ph.D Geology. (sedimentology/petrophysics ) 1992

---

**Research areas:**

Currently I am a Petrophysist/Borehole-Geologist working on tight gas in the Anadarko Basin, mid-continent USA. My approach is to looking at the problem of tight gas is to approach it more as a carbonate rather than a clastic. My main interests are the use borehole image and dipole sonic for solutions to sedimentary, structural, and petrophysical problems and as odd as it seems integrating micropaleontology into petrophysical interpretations.
