

Name: Jafar Abdollahi

Tel: +47 73591175, **Fax:** +47 73597740

Adress: Norwegian University of Science and Technology – Department of Petroleum Engineering and Applied Geophysics, SINTEF Petroleum Research, Oil and Gas Solution, S.P Andersens vei 15B- 7465 Trondheim- Norway

Education: PhD student and Research Scientist 2002

Research areas:

My research area is drilling optimization in carbonate fractured reservoirs. There is a new drilling procedure which is called “Underbalanced Drilling” to apply to eliminate mud loss problem in fractured reservoirs. Sponsor of the project is SINTEF petroleum research located in Trondheim. I have started my project in 2003. I also have 8 years experience in drilling of fractured /carbonated reservoir in Iran.
