

Name: Joanne Ballard

Tel: 812-968-0346, seldom home or phone is tied up for internet; best to use internet to contact

Address: USA

Education: Interdisciplinary, unorthodox

Research areas:

Paleoclimatology

Understanding the woolly mammoth extinction event, which involves many disciplines. I intend to help solve this mystery, with other scientists. In my opinion it was a matter of climate, and carbonates figure in to understanding what happened.

Catastrophic events in Earth's history.

Methane hydrates.

Rethinking Ice Age theory, involving the hypothesis of Rapid True Polar Wander

Currently an undergraduate student at Indiana University Southeast in New Albany Indiana majoring in geology/geography.
