

Name: Luhut Partumpuan Gultom

Tel: +62 21 5236123

Adress: Jl. HR. Rasuna Said Kav. C11-14, Kuningan Plaza South tower 8 Floor, Jakarta 12940, Indonesia.

Education: Geological Engineering (Bachelor level)

Working areas:

I'm currently working on a project called "mapping project" in Vico Indonesia (our field in kalimantan timur) were the aim is to understand distribution and nature of sand distribution and gas reserve. My focus in this aspect is sandstone (rock) in shallow interval and limestone (rock) in deep interval. With respect to limestone, the working focuses on understanding the nature and distribution of sandstone and limestone. Special emphasize is given to the sand and limestone environment and the porosity and permeability map for each zone that I map.
