**Adress:** Hycarbex American Energy Inc. # 3, St.# 32, F-8/1 Islamabad, Pakistan

**Education:** M.Sc. (Applied Geology, Petrophysics) 2003

---

**Research areas:**

My research focuses on the petrophysical evaluation and reservoir characterization of limestones. I'm currently working on limestone reservoir in Pakistan, were the aim is to evaluate the petrophysical analysis and to understand the reservoir quality. The study focuses on understanding the nature and distribution of fractures and pores. Special emphasize is given to the interpretation of Sonic and Resistivity Log. The techniques applied to this study are Open Hole Logs, Core Analysis and Well Test Data.
